

Caravan: The Merchant's Road

Merchant's Ledger

c. 800

Name: _____

Period: _____

Date: _____

Fill this in while you play. Copy the numbers from the screen. You do not need to do any math until the very end.

DAY 1

The price of 1 load of silk at each stop

Write the silk price from the price board when you arrive in each city.

Chang'an

Dunhuang

Kashgar

Samarkand

Baghdad

Constantinople

My trade log

City	What I bought	What I sold	My road decision – and why
Chang'an			
Dunhuang			
Kashgar			

My Caravan Code (end of Day 1)

-

-

Copy it exactly from the screen. Capital letters and numbers only — it never uses I, L, O, or U.

DAY 2

City	What I bought	What I sold	My road decision – and why
Samarkand			
Baghdad			
Constantinople	What I sold to Anna		Coins I finished with (write this on page 2 too)  _____

Caravan: The Merchant's Road

Merchant's Ledger

c. 800

How did I do?

Every merchant started with 60 coins.

I finished with _____ coins.

Circle one and fill in the blank:

A I finished with MORE than 60. My coins – 60 = _____ coins earned

B I finished with FEWER than 60. 60 – my coins = _____ coins lost

Example: a merchant who finished with 118 coins writes $118 - 60 = 58$ coins earned.

Think and write

1. Silk cost 8 coins in Chang'an and 90 in Constantinople. In your own words, why did the price grow at every stop?

2. Vandak said: "I have never seen China. My silk has." What did he mean?

3. Would you rather be a merchant who runs one leg of the road, or the whole road like you just did? Why?

Exit ticket

Name one thing that traveled the Silk Road that was not a good for sale, and tell how it traveled.
